

*A complete fireplace solution
designed for small space living.
Safe, simple and quick to install.*

CHARNWOOD 
STOVE POD

CHARNWOOD

STOVE POD

The Charnwood Stove Pod is an instant fireplace solution designed for cabins, yurts, tents, boats, home offices and other tiny home accommodation. It combines a stylish curved steel enclosure with an ultra efficient Charnwood Aire 3 wood burning stove to create a safe, protected focal point for any room.

THE POD

The Pod can be safely placed just 50mm from combustible materials and can sit on any hard, flat surface without the need for an additional hearth. It is available in a matt black powder coat with the option to add a VLAZE vitreous enamel liner available in two beautiful easy to clean finishes.

THE STOVE

The Charnwood Aire 3 offers a large view of the fire. It is very simple to operate with one single air control and features a sliding firebed for easy ash removal. The stove is Ecodesign Ready and carries a clearSkies 5 rating making it one of the most environmentally friendly stoves on the market today. An optional cooking plate can also be fitted for an enhanced cooking experience.
